## Job Description

---

Acquity Group is a high-growth business and technology consulting firm focused on providing solutions aimed at optimizing business performance. With more than 210 national clients who are 100% referenceable, we are an industry leader and 7th on Crain's list "The Fast 50" -- Fastest growing companies in Chicago.

We have been retained by our client to hire a Senior Java/J2EE Developer for Atlanta, GA. Our client's primary business focuses exclusively on designing and underwriting coverage targeted to the special needs of contractors and subcontractors. They provide clear and specific policies suited to each contractor's needs eliminating the risk associated with greater claims exposure. Whether a sole proprietor or large contract shop doing residential or commercial, they offer scalable solutions with superior technology; owning all core insurance functions in-house (risk management, client services, underwriting and claims). They react quickly to market needs and their unique structure permits rate and form flexibility with the ability to get a policy in 2-5 days with 24/7 claims support.

### JOB SUMMARY

The Sr. Enterprise Developer is responsible for the development of J2EE components / services for enterprise Insurance systems. The developer will design, develop, test and deliver J2EE components. Enhancements and defect resolution will be required on an ongoing basis. Best practices and design patterns will be heavily utilized to insure the success of the system. The developer will be required to translate UML diagrams into class structures for a component based system. They will be required to test, analyze, and provide solutions to operational and performance problems.
